

## Triethanolamine

You are allergic to triethanolamine. This means that you should avoid all products containing triethanolamine in the future.

Triethanolamine is an emulsifier which contains monoethanolamine and diethanolamine. It may also be known as Trolamine, 2,2',2''-Nitrilotriethanol or Sterolamide. It may be found in some of the following types of products:

- Household detergents
- Cosmetics and personal care products including foundations, blushers, shampoos, shaving gels, moisturising creams
- Industrial uses such as in metal working fluids, corrosion inhibitors and colour film developers, water repellent fabric finishes
- Ultrasound gels
- Sunscreens
- Medicaments including Boots chilblain cream, Bonjela junior gel, Lanacane cream, Psoriderm cream and bath emulsion
- Therapeutic shampoos and scalp products such as Psoriderm scalp, Capasal therapeutic shampoo,
- Moisturisers including Adex gel, Eurax cream, Doublebase Dayleve gel, Doublebase gel, Doublebase emollient shower gel, Vaseline intensive care advanced repair lotion
- Creams for musculoskeletal pain such as ketoprofen 2.5% gel, Oruvail gel, Algesal
- Hormone gels including Oestrogel, Sandrena gel, testosterone gels
