

Caine Mix

Your patch tests show you have a contact allergy to Caine Mix. This means that you should avoid contact with products containing skin numbing creams (anaesthetics) in the future. The Caine Mix you were tested to contains:

- Benzocaine
- Cinchocaine (Dibucaine)
- Amethocaine (Tetracaine)

You may be allergic to one or more of these.

Products with the local anaesthetics you are allergic to include:

Benzocaine

Anthisan plus
BurnEze
Wasp-eze spray
Lanacaine
Solarcaine
Rinstead gel
AAA Sore throat
Spray
Dequacaine
Merocaine
lozenges
Tyrozets
Vicks Ultra
Chloraseptic
Intralgin

Cinchocaine (Dibucaine)

Nupercainal
Proctosedyl
Scheriproct
Ultraproct
Uniroid-HC

Amethocaine (Tetracaine)

Anethaine
Ametop gel
Eludril spray
Tetracaine eye drops

You are very unlikely to have any problems with injectable anaesthetics such as those used by your dentist or for skin surgery.

Always check your products as these lists can never be complete and ingredients change
