

## **Chloramphenicol**

Your patch tests indicate that you have a contact allergy to chloramphenicol. This means that you should avoid contact with this substance in the future.

Chloramphenicol is an antibiotic found in some eye drops, eye ointments and ear drops. Chloramphenicol preparations may be prescribed or are available over the counter without a prescription. They may be known by a variety of different trade names.

**Always check the ingredient listing on the product, package or package insert. Ingredient listings may change over time.**
